

When using or handling your SMARTBAR equipment, do not bring it into contact with sharp or abrasive objects/materials. We recommend jewellery/rings are removed as they can scratch the bar. Rings can also be damaged by the knurling on the bar.

We do not recommend using SMARTBAR equipment outside (particularly on abrasive surfaces like rough concrete) or on non-standard gym/studio flooring. We recommend working out on a smooth, firm surface or using a fitness mat with a durable but soft surface (e.g. grey side of the Les Mills MBX MAT™)

The SMARTBAR has been designed and tested to withstand normal use within a LES MILLS workout, while loaded with a maximum weight of up to 60kg/132lb. The SMARTBAR is not a replacement for a standard (Olympic) barbell that is used for consistently heavy lifts.

We do not recommend applying weight to the central section of the SMARTBAR while it is lying on the floor. This includes using the SMARTBAR as an aid for push-ups, or as a support for a user's weight. Using the SMARTBAR in this way can result in the bar developing a permanent bend.

STORAGE

Store the SMARTBAR and weight plates indoors, keeping the equipment away from moisture or direct heat. Do not store in extreme temperatures (<-5°C/41°F; >50°C/122°F).

For storage in a club/facility, we recommend using the SMARTBAR Storage Rack, or hanging vertically on a wall rack. At home, we recommend storing the SMARTBAR horizontally on a solid, level surface, or on its end vertically. Always ensure weight plates are removed from the bar for storage.

Do not leave the SMARTBAR bar (with or without weight plates attached) hanging over a SMARTSTEP™, or any other object where the weights or the end of the SMARTBAR are unsupported or hanging off the ground.

CLEANING

Regularly clean SMARTBAR equipment by gently washing with water and a few drops of mild dish soap, using a soft cloth or sponge.

Wiping the SMARTBAR bar with a soft cloth after using on carpet (or a household rug) will help to ensure fibres do not become caught in the gator (where the weight plates connect).

DIMENSIONS & WEIGHT

Metric: Barbell = 131.2 x 13.1 x 9.1cm, 2.64 kg; Weight Set = 17kg (2x 1kg, 2x 2.5kg, 2x 5kg)

Imperial: Barbell = 51.65 x 5.17 x 3.56 inches, 5.85 lb; Weight Set = 37.5 lb (2x 2.2lb, 2x 5.5lb, 2x 11lb)

CONSTRUCTION

High-quality raw materials to ensure durability and safety. SMARTBAR equipment is tested for durability in a high-use gym environment.

SMARTBAR™ – CRITERIA NOT COVERED BY WARRANTY

- Cosmetic wear to the surface from regular use that does not affect the performance of the SMARTBAR equipment (bar or weight plates)
- Damage from abrasive floor surfaces including outside elements or factors or sharp objects
- Damage from misuse/rough handling (e.g. incorrect vertical loading, dropping, dragging etc)
- Improper cleaning with anything other than water with a mild detergent or a Les Mills recommended alternative
- Damage from excessive amounts of water or other liquids (e.g. submerging under water or using a water blaster)

LES MILLS SMARTBAR

WARRANTY &

INSTRUCTIONS FOR USE

To make a warranty claim, either contact your local Les Mills authorised distributor or visit our website <https://lesmills.com.au/smart-tech/equipment-care>

SMARTBAR™ – WARRANTY INFORMATION

WARRANTY INFORMATION

At Les Mills Merchandise Limited (Les Mills) we stand behind our materials and manufacturing and provide a **three-year warranty** (from date of purchase) for manufacturing faults caused by materials or labour. Les Mills and its local SMARTBAR™ distributor will, at their discretion, either repair or replace faulty SMARTBAR equipment in accordance with the conditions set out below.

Proper care and maintenance of SMARTBAR equipment is required (like any other product) to ensure proper functionality and longevity. Les Mills is not responsible for any damage or injury due to misuse or the failure to properly assemble the SMARTBAR. The following guidelines should prolong the life and reduce wear on the SMARTBAR.

Personal Use Customers Only

As a consumer, you are entitled to the applicable legal rights stated in your national legislation concerning the commerce of consumer goods. This warranty does not restrict these rights.

WARRANTY TERMS

This warranty is only valid in countries where Les Mills has an authorised SMARTBAR distributor or reseller. It covers manufacturing faults occurring during the warranty period for any SMARTBAR purchased from Les Mills or a distributor/reseller authorised by Les Mills. The warranty applies only to the original purchaser and does not cover any second-hand or resold SMARTBAR. The SMARTBAR must remain in the possession of the original buyer/owner and bear the original manufacturer's serial number (for the SMARTBAR bar) or batch code (for the SMARTBAR weight plates). The three-year warranty period commences from the date on which the original buyer purchases the SMARTBAR. Warranty repairs will not extend the warranty period.

The serial number for the SMARTBAR bar is located inside the gator head. Pull the release on the gator to reveal the serial number. The batch code dials for the SMARTBAR weight plates are located on the top of the weight plate near the Les Mills logo.

EXCLUSIONS

This warranty covers only failures due to manufacturing faults that occur during normal use. This warranty does not extend to faults resulting from normal wear, misuse, abuse, corrosion, damage incurred during loading or transportation, improper storage, modification without the consent of Les Mills, or where the SMARTBAR equipment has been used other than as recommended by Les Mills (see the following instructions below and our guidelines for using the SMARTBAR equipment at <https://lesmills.com.au/smart-tech/equipment-care>). This warranty is invalid where the SMARTBAR equipment does not bear its original manufacturer's serial number (for the SMARTBAR bar) or batch code (for the SMARTBAR weight plates). This warranty is invalid where the SMARTBAR equipment that is the subject of a warranty claim, has been disposed of prior to a warranty claim being closed by Les Mills.

Neither Les Mills nor its authorised local SMARTBAR equipment distributor/resellers will be liable for any defects due to reasons beyond their control, or for consequential damages, or for breach of any implied warranty on the range of SMARTBAR equipment.

CLAIM PROCESS

For enquiries, or to make a warranty claim, either contact your local Les Mills authorised SMARTBAR equipment distributor/reseller or visit <https://www.lesmills.com.au/smart-tech/warranty>. Please keep your invoice as proof of purchase as you will need this to submit a warranty claim. Please keep in mind, warranties are voided if any product is purchased from an unauthorised reseller.

You will also need to include the following details about the faulty SMARTBAR equipment: the serial

number or batch code, date of delivery, information about the place and conditions of use of the faulty SMARTBAR equipment, and a precise description of the fault (including photographs). The Les Mills local SMARTBAR equipment distributor will liaise with Les Mills to assess the issue and determine if the warranty applies. We will then work with our local SMARTBAR equipment distributor to repair or replace the SMARTBAR equipment. If we ask you to return the faulty SMARTBAR equipment, we will cover the cost of doing so.

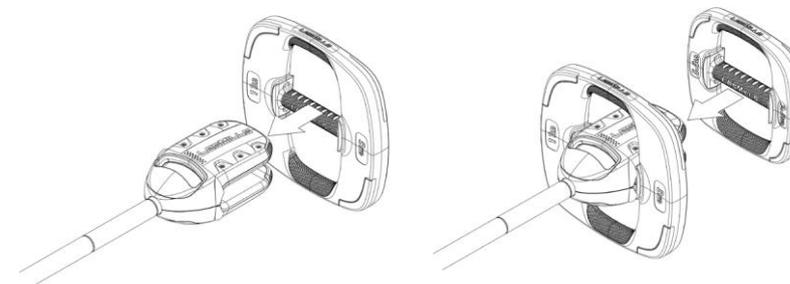

SMARTBAR™ – WEAR & CARE INFORMATION

Guidelines for the use and care of SMARTBAR™: <https://lesmills.com.au/smart-tech/equipment-care>.

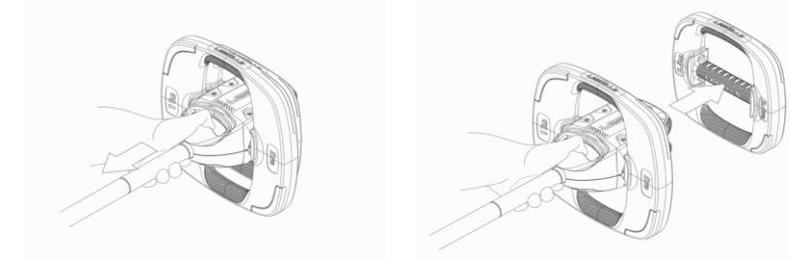

HANDLING & USE

Do not hold the bar vertically to load or unload weight plates.

To Load: Lay the SMARTBAR on the ground and slide the SMARTBAR weight plates into the gator head, ensuring that it locks securely into place. Load weight plates one-by-one up to a maximum of three weight plates (of any weight) on each side. Load weights from largest to smallest so that the heaviest weight sits on the inside of the gator (i.e. closest to where it attaches to the bar).

To Unload: To release a weight plate, lay the SMARTBAR bar on the ground, pull the red handle towards the centre of the bar, then slide the weight off the bar. Remove weights one-by-one.

A video showing this process can be found at <https://lesmills.com.au/smart-tech/equipment-care>.

Do not drop, throw or drag the SMARTBAR or weight plates. Dragging the SMARTBAR across the floor can result in damage to the rubber ends of the SMARTBAR.

Though the SMARTBAR has been designed and tested to withstand typical use within a gym, we recommend it is treated with care to avoid damage. Excessive drops and rough handling can result in cosmetic damage and could lead to internal damage to the weight plate locking mechanisms.
